### Enterprise Storage that Scales, Learns and Evolves

The InfiniBox<sup>®</sup> enterprise storage array delivers faster-than-all-flash performance, high availability, and capacity density at multi-petabyte scale for mixed workloads. Zero-impact snapshots, synchronous/asynchronous replication, and data-at-rest encryption assure maximum data security and reliability. With InfiniBox, enterprise IT organizations and cloud service providers exceed their service level objectives while lowering the cost and complexity of their storage operations.

## HIGH AVAILABILITY AND RELIABILITY

InfiniBox's self-healing architecture, designed to deliver unmatched availability, combined with our patented InfiniRAID™ and predictive analysis, delivers seven nines (99.99999%) uptime and non-disruptive upgrades. The InfiniBox component redundancy design enables rapid recovery from any component failure without impacting performance.

## HIGH PERFORMANCE

A truly innovative cache management algorithm combined with an ultra-efficient data layout (InfiniRaid™) delivers maximum performance at a fraction of the cost of all-flash arrays. High throughput, at sub-millisecond latency, is the key to high performance operation as well as powering synchronous and asynchronous replication for block and file.

## MULTI-PETABYTE SCALE

Maximum system capacity utilization is possible due to extremely efficient thin provisioning, continuous space reclamation, and inline data compression. Packaged in a single 42U rack and scaling to well over 8PB or more effective capacity, multiple system consolidations are easy to accomplish and remarkably cost-effective.

## BUSINESS AGILITY AND CONTINUITY

Space-efficient, low impact snapshots simplify data protection as well as accelerating agile development and quality assurance with nearly infinite copies of your data. Integrated synchronous and asynchronous replication provides the highest levels of data reliability for both onsite and offsite business continuity and disaster mitigation planning.

## SIMPLE AND POWERFUL MANAGEMENT FOR MULTI-TENANT ENVIRONMENTS

An intuitive HTML5 GUI simplifies the most complex storage management operations. A comprehensive RESTful API and a powerful CLI help automate complex tasks, including policy management for Quality of Service. Easily facilitate service level coordination across tenants, workloads, and volumes. Monitor and measure all feature performance elements using InfiniMetrics.

## UNIFIED STORAGE

InfiniBox concurrently provides FC, iSCSI and NFSv3 NAS protocols in a single, common platform managed through a single, simple and consistent management interface.

## CONNECTIVITY AND INTEGRATION

InfiniBox integrates with the critical business applications in your datacenter using native interfaces. The InfiniBox ecosystem includes a rich solution portfolio for platforms such as virtualization, databases, backup & recovery, and more. Our fast and intuitive host connectivity and storage provisioning - Host PowerTools™ - reduces management tasks from days or hours to seconds!

## InfiniBox Specifications

	F6000	F4000	F2000
<b>Capacity</b>			
Usable Capacity	1,035 TB to 4,149 TB	512 TB to 1,366 TB	248 TB to 499 TB
Effective Capacity*	2,070 TB to 8,298 TB	1,024 TB to 2,732 TB	496 TB to 998 TB
<b>Performance Features</b>			
Memory	Up to 3,072 GB	Up to 2,304 GB	Up to 768 GB
Flash Cache	Up to 207 TB	Up to 207 TB	Up to 103 TB
IOPS	1M IOPS	750,000 IOPS	500,000 IOPS
Throughput	12.5 GB/Sec	10 GB/Sec	7 GB/Sec
<b>Connectivity and Integration</b>			
FC Ports	24 x 8Gbps		
Ethernet Ports	12 x 10GbE		
Ecosystem Integration	VMware, OpenStack, CommVault, Veeam, Veritas, Microsoft, SAP, Host PowerTools for Linux, UNIX, Windows		
<b>Availability and Protection</b>			
Fully Redundant Hardware	N+2 Redundant System Components Resilient Against Multiple Concurrent Failures Triple-Active Redundant Nodes		
Data Protection	Fastest Rebuild in the Industry In-Line and At-Rest Data-Verification Synchronous and Asynchronous Replication (<4s RPO)		
<b>Scalability</b>			
Max. Volume/File System Size	Unlimited		
Max. Files per Directory/File System	> 17B		
Max. Number of Volumes	Unlimited		
Max. Number of Snapshots	100,000		
Max. Number of File Systems	4,000		
Max. File Size	> 1PB		
<b>Support</b>	Three Years of 24 x 7 x 365 Maintenance — No Additional Cost		
<b>Pricing and Licensing</b>			
System Feature Licensing	All Features Included — No Additional Cost		

\*Effective Capacity includes the benefits of thin provisioning, inline compression, and space-efficient snapshots
