

Infinidat was founded in 2011 by a team of storage industry experts focused on returning business value to customers by eliminating the compromises between performance, availability, and cost at multi-petabyte scale for enterprise storage.

OUR STORY

Too often, organizations cannot collect all the data they want or take full advantage of all the data they have, due to high costs and poor designs of large-scale legacy storage systems.

To address these challenges, Infinidat put together a world-class team of inventors and innovators. This team combines proven approaches for reliability and integrity with new approaches for performance and ease-of-use. The result is a team, a technology foundation, and a set of solutions rooted in the fundamental requirements for reliable enterprise storage while embracing cutting-edge innovation.

We determined that there is a better, faster way to store and protect multiple petabytes of data, with the highest possible availability at the lowest possible TCO. Their innovative approach is the technological foundation of the InfiniBox® and the rest of the products in the Infinidat portfolio.

OUR GROWTH

Investors and customers have clearly embraced Infinidat's approach to innovation. Infinidat has established a healthy business with consistent revenue growth. Infinidat's investors include TPG Growth and Goldman Sachs, with the total investment to date totaling \$325M, establishing a post-funding valuation of \$1.6B. The global customer install base, covering a multitude of vertical industries including healthcare, financial services, and cloud service providers, is comprised of 7.1 exabytes of storage capacity as of 4Q 2020.

Today, Infinidat has filed for more than 140 patents, strong revenue growth, and an expanding team of technical professionals dedicated to the success of our customers in their efforts to innovate and grow.

INFINIDAT TECHNOLOGY FOUNDATION

Unique to the Infinitat portfolio is the use of a set of fully abstracted software-driven functions. These functions include our **Neural Cache**, **InfiniRaid®**, and **InfiniSnap®** technologies. When layered on top of very low-cost commodity hardware, the result is multi-petabyte enterprise storage solutions with 100% availability, high performance, and support for a multitude of workloads at scale.

INFINIDAT SOLUTIONS

Infinitat enterprise storage solutions are installed in Global 500 companies around the world supporting a wide variety of applications and use cases. All of this work was done with a single goal in mind — enable customers to spend less on their infrastructure and focus more on innovation and growth.

ENTERPRISE STORAGE SOLUTIONS FOR THE FUTURE

Today Infinitat supports the enterprise data storage solutions: **InfiniBox®**, **InfiniBox SSA™**, **InfiniGuard®**, and **InfiniVerse®** with an eye towards continuing to support our customers’ continued success.
